Member of Consilium Radiologicum (2004-2011) and College Radiologie (2004 – 2014) (FGov)

Past-President and former member of “Erkenningscommissie Radiologie” (Recognition Board of Radiology) (FGov) 2001-2017

Presents:

Whiplash injury in 1568

A lecture that focuses on a “whiplash injury” that occurred in the year 1568.

The radiological aspects of this case will be discussed, based on a forensic and radiological study of the cervical spine of the victim.

These findings will be used to explain the mechanism of the whiplash injury.

The reason why and how this “accident” could happen will be discussed in a historical context.
